Installing this list while owning the full, paid AE is unsupported and done entirely at your own risk, however, during testing, at least one user with the full AE successfully installed the list by following these steps, so results may vary. If you own the paid AE upgrade, it is strongly recommended to back up the following folders before starting:

(Optional Backup)

C:\Users[name]\OneDrive\Documents\My Games

C:\Users[name]\AppData\Local\Skyrim Special Edition

C:\Games\Steam\steamapps\common\Skyrim Special Edition

- 1. Delete the folders listed above.**
- 2. Uninstalled Skyrim Special Edition from Steam.**
- 3. Reinstalled Skyrim Special Edition through Steam.**
- 4. Right-clicked the game in Steam, selected Properties > DLC, and unchecked the Anniversary Upgrade.**
- 5. Launched the game, let it run the automatic settings detection, and then clicked Play.**
- 6. If you received a pop-up about downloading Anniversary content, exited the game using the console command: qq**
- 7. Download and install Wabbajack.exe**
<https://github.com/wabbajacktools/wabbajack/releases/download/4.0.5.1/4.0.5.1.zip>
- 8. Run Wabbajack.exe**

9. Log in to your Nexus Mods account (Premium is highly recommended for automatic downloads).

10. Downloaded KIMUT NSFW 2026 Modlist Wabbajack extracted it using 7-Zip, or WINRAR.

11. Click (Install from Disk) and select "KIMUT NSFW Modlist 2026.wabbajack"

12. Set the Installation Location (where the game mods go) and Download Location (where temp files go). Do not use the same folder.

13. Click the arrow button to start the process.

14. After downloading KIMUT NSFW Modlist 2026, you need to download this Requirement:

- Community Shaders AIO Jiaye (<https://discord.gg/eMVaJyzH>) "[CS-Jiaye-Exp-26-01-20-RR.7z](https://cdn.discordapp.com/attachments/1434192247687086100/1463042058137632879/CS-Jiaye-Exp-26-01-20-RR.7z?ex=69842a18&is=6982d898&hm=cc95b705a90695e60f01f8819dab8cdbc9a09bd776c81ab93fd17e5e8bf778ac&)"

15. Placed Community Shaders AIO Jiaye & Dlizzios Post Processing for CS files downloaded.rar into my Wabbajack Downloads folder so they would appear in Mod Organizer 2's Downloads pane on the right (after refreshing).

16. Moved Community Shaders AIO Jiaye & Dlizzios Post Processing for CS files into the Outputs separator in the load order.

17. Enabled them.

18. Disabled or deleted "CarryweightExtended.esp" in the Plugins pane on the right.

19. launched the game using skse64_loader.exe through Mod Organizer 2.

20. Press F12 while in-game for Community Shaders overlay and then go to post processing, choose "Kirby King profile" click Load.

21. Enjoy then.
